1. Reconstruction work on oil storage plants is being carried out in the Split area between Salona and Kastel Sucurac.
2. The reconstruction program includes:
 - a. Re-activation of the former Shell company storage tanks, situated near Salona. The pumping plants have already been put into working order and it is estimated that five tanks (of 2,000 cubic meters capacity each), will be ready by June 1949.
 - b. The laying of foundations for the construction of 15 to 20 storage tanks above ground level.
 - c. Excavation and preparation of ground for subterranean storage tanks of reinforced concrete.
3. About three hundred workers are at present employed upon this new construction work.
